

What is PreRepair®?

- "Preventive Maintenance" is obsolete because it's *incomplete*. Don't be fooled. Oil changes are *not* the only component necessary for proactive vehicular health.
- **PreRepair®** is the **Prevention of Repair**--a comprehensive package *already proven successful* and available exclusively at Car Clinic Service/PreRepair®. So good we've trademarked it.
- PreRepair® is an on-going **monitoring & follow-up system** for the lifebloods / fluids of the vehicle for major mechanical components (like cooling system, power steering, engine, transmission, transfer case, differential, brake, air conditioning, EGR valves) ... with services designed to **prolong vehicle life & performance** ... & to **prevent breakdowns**. Imagine the joy of driving a vehicle with maximized performance ... and the cost effectiveness of minimized repair.
- PreRepair® is so good it comes with a nationwide **Lifetime Protection Plan** if the vehicle qualifies (backed by national underwriter) -- which is **transferable**. Imagine the confidence that if there is a problem, your vehicle has protection. And imagine the increased value when the vehicle is sold because the protection plan goes with it.
- A PreRepair® **dossier** is created on each automobile that tracks that automobile throughout its life ... and through Car Clinic Service PreRepair®'s exclusive **GLOBO** (our on-line **GLOve Box**), all service records are available 24-7 from anywhere. GLOBO also offers Car Clinic Service/ PreRepair® customer clients additional services like on-line appointment scheduling, customer satisfaction surveys and more. Imagine the power of accessing your vehicle records any time from anywhere. No more digging through paper records. Imagine the increased value at sales time when your vehicle can be "certified" if you trade it in ... or services "proven" to potential buyers.
- PreRepair® makes it easy for you with our **customer client follow-up**, both paper & electronic. Imagine the security of Car Clinic Service/PreRepair® letting you know when it's time for service.
